

CDMO (Senior) Scientist for Minerva Imaging

Minerva's CDMO is looking for a new addition to the team. We are looking for a (Senior) Scientist with a background in radiochemistry and/or analytical chemistry to contribute to development work within our CDMO.

The position is within a dynamic and multidisciplinary team that develops manufacturing and analytical setups for targeted radionuclide therapies. This necessitates close collaboration with our scientists and technicians across the organization. It is essential that you are a good team player and have excellent communication skills, are efficient and have an eye for detail to maintain the high quality of data we are known for.

The ideal candidate will be a PhD level radiochemist with prior experience in CMC and GMP. But the most important thing is interest, a quick mind, and a willingness to learn. You will be part of an experienced team, and your role will include a wide range of responsibilities:

- Development of robust production setup, including material selection, process design and process descriptions
- Development of analytical setup
- Engage with clients regarding development activities
- Synthesis setup and automation on dedicated synthesis modules
- Validation of processes and analytical methods
- Equipment qualification

All within a new and expanding GMP clean room facility

Qualifications:

- Ideally a PhD in radiochemistry, radiopharmacy, analytical chemistry
- While prior experience in radiochemistry is not mandatory, a willingness and aptitude to learn are essential.
- Experience in analytical method development, validation, and lifecycle management in a GMP-regulated environment.
- 3+ years relevant experience in an academic or industrial environment.

As a person, you:

- Are a team player, committed, organized, curious and adaptable to change.
- Can influence and interact with multiple stakeholders across levels and disciplines.
- Thrive in a fast-paced and service-oriented organization.
- Have strong written and verbal communication skills in English. Danish is an advantage.

Minerva offers:

We believe in creating an agile working environment, so we have flexible working options including the option of working from home. We care about our employees' well-being and offer health insurance and a quality conscious lunch scheme and monthly social activities.

We are an informal organization with a strong focus on open and honest communication. We value humour and a natural care for one another.

Application:

Please submit your application no later than October 30th 2026. The application must include a motivated cover letter and a CV addressing the listed qualifications. Applications will be evaluated continuously, and the position will be filled as soon as the right candidate has been identified.

If you have questions regarding the position, please contact Head of Production Kent Dahm Nørgaard at KEN@minervaimaging.com or Head of QC Palle Rasmussen at PAR@minervaimaging.com

About Minerva Imaging:

Minerva Imaging is a scientifically driven and fully integrated Contract Research Organization (CRO) and Contract Development and Manufacturing Organization (CDMO) specializing in targeted radionuclide therapies.

We support translational research and drug development through the use of advanced preclinical animal models within oncology and cardiovascular diseases, combined with state-of-the-art in vivo molecular imaging. By working in close partnership with our sponsors, we seek to understand their scientific challenges and jointly identify how our expertise, technologies, and methods can deliver robust and meaningful answers.

Our modern facility in Ølstykke, Denmark offers best-in-class, fully integrated radiopharmaceutical research, development, and manufacturing capabilities—covering the entire value chain from early research to clinical supply.

Backed by Nordic Capital since 2026, Minerva Imaging is executing an ambitious growth strategy aimed at strengthening our position as a market leader within targeted radionuclide therapies. This growth journey offers exciting opportunities for individuals who want to contribute to cutting-edge science in a dynamic and international environment.

Minerva Imaging is an equal opportunity employer, and we welcome applications from qualified candidates regardless of background or experience. In accordance with our recruitment policy, all candidates are required to provide a personal criminal record as part of the hiring process.
