Imaging Technician for Minerva Imaging

Minerva Imaging is looking for a Imaging Technician to join our imaging team operating PET/SPECT,CT/US and MRI. If you are eager to take part in pioneering breakthroughs in translational cancer research and drug development, then Minerva Imaging might be the place for you to develop.

Minerva Imaging is at the forefront of R&D in the theragnostic area advancing new, improved and lifesaving drugs for seriously ill cancer patients. To support our growth, we are looking for an imaging technician for our dynamic imaging team. The imaging team operates as a central core function across small and large animal pharmacology departments supporting studies from early target validation, selecting lead candidates, to monitoring therapeutic efficacy using various advanced imaging modalities.

As an imaging technician, you will play a crucial role in our efforts to become an “Imaging centric” - the preferred partner for global pharma and biotech companies for translational imaging studies.

About the position

As an imaging technician at Minerva Imaging, you will be a key member of our highly interdisciplinary imaging department dedicated to accelerating translational drug development programs with molecular imaging.

The position is in a dynamic and exciting team of dedicated technicians and scientists collaborating closely in the team as well as across departments on timely conduct of imaging studies delivering high-quality data. You will work with cutting-edge molecular imaging equipment like PET/SPECT/CT, MRI, ultrasound and autoradiography in our new state-of-the-art facility where we continuously expand our capabilities.

The ideal candidate possesses practical experience with different imaging modalities; however, the most important thing is interest, and a willingness to learn.

You will be part of an experienced team, and your role will, among other things, include:

- Operating preclinical and clinical imaging modalities (PET/CT, SPECT/CT, MRI, ultrasound and autoradiography)
- Analyzing and reporting of image data together with imaging scientists
- Setting up imaging protocols and new methodologies in collaboration with relevant experts in the organization
- Quality assurance of imaging equipment and procedures
- Optimizing workflows & procedures related to image acquisition and data analysis
- Participate in interdisciplinary projects and activities across departments in the organization

Working hours are primarily during daytime on weekdays, with occasional late afternoons and weekends, which are compensated in accordance with our flex policy.

Qualifications:

Educational background as a laboratory technician, biomedical laboratory scientist, radiographer or equivalent.

- Prior experience with imaging modalities like PET/CT, SPECT/CT, MRI, ultrasound and autoradiography is advantageous
- Prior experience with handling of laboratory animals is advantageous
- Proactive, self-motivated, and independent working style
- Ability to work flexibly across projects and adapt to new priorities in a fast-paced environment
- Prior experience with radioactive isotopes is advantageous
- Our business language is English, so we expect you to speak and write English

Minerva offers:

We believe in creating an agile working environment, so we have flexible working options including the option of working from home. We care about our employees' well-being and offer health insurance and a quality conscious lunch scheme and monthly social activities.
We are an informal organization with a strong focus on open and honest communication. We value humour and a natural care for one another.

Application:

Please submit your application to us no later than 30.11.2026. The application must include a motivated cover letter and a CV addressing the listed qualifications. Applications will be evaluated continuously, and we will hire when the right candidate has been found.
If you have questions regarding the position, please contact Elin Sergi-Lindell at esl@minervaimaging.com

About Minerva Imaging:

Minerva Imaging is a scientifically driven and fully integrated Contract Research Organization (CRO) and Contract Development and Manufacturing Organization (CDMO) specializing in targeted radionuclide therapies.
We support translational research and drug development through the use of advanced preclinical animal models within oncology and cardiovascular diseases, combined with state-of-the-art in vivo molecular imaging. By working in close partnership with our sponsors, we seek to understand their scientific challenges and jointly identify how our expertise, technologies, and methods can deliver robust and meaningful answers.
Our modern facility in Ølstykke, Denmark offers best-in-class, fully integrated radiopharmaceutical research, development, and manufacturing capabilities—covering the entire value chain from early research to clinical supply.
Backed by Nordic Capital since 2026, Minerva Imaging is executing an ambitious growth strategy aimed at strengthening our position as a market leader within targeted radionuclide therapies. This growth journey offers exciting opportunities for individuals who want to contribute to cutting-edge science in a dynamic and international environment.
Minerva Imaging is an equal opportunity employer, and we welcome applications from qualified candidates regardless of background or experience. In accordance with our recruitment policy, all candidates are required to provide a personal criminal record as part of the hiring process.
